Oversight Committee
March 15, 1979

Strengths

- Each program element supports the other
  - research learning
  - Data production is user driven

- Operational committments by bureaus
- Multi disciplined which doesn't fit Dunn

Problems

- Although EROS is a Depart. Program, program objectives are impacted, understandably, by bureau priorities on budgets or personnel
- Criticism from other bureaus: EROS is the hand-maiden of the USGS
- "Clout" of the bureau coordinator
- Difficulty in measuring use of space technology
- Critical mass: DNR NOAA/NESS

USGS 22
EROS 160
Other 220
611

Recommendations

- Visit to EDC
- ~~Program~~ Visit to NOAA/NESS integration w EROS
- Visit to NESS
