IN REPLY REFER TO:

OC 7-10
OPBA 7-13

MEMORANDUM

July 15, 1997

To: Acting Chief, National Mapping Division

From: Donald T. Lauer 
Chief, EROS Data Center

Subject: Hail Damage

Per your request, the attached table gives a preliminary estimate of the hail damage sustained at the EROS Data Center during the storm of July 13, 1997. Ms. Rayleen Cruz, Acting Chief, Office of Program Support for the Central Region, will be at the Center tomorrow. With the help of Rayleen and her staff, we will continue to refine the cost estimates for repairing or replacing these facility items. If we are able to obtain Congressional support to cover some or all of these costs, I recommend it be budgeted by USGS as a Facilities Activity rather than a National Mapping Division Activity, so it is not confused with on-going or planned programmatic activities.
