EROS Data Center
Sioux Falls, South Dakota 57198

IN REPLY REFER TO: OC 11-5

November 6, 1987

Memorandum

To: Henry Phillips, NOAA, Code 435.7
Michael Mahoney, NASA, Code 560.0

From: Chief, EROS Data Center

Subject: Transfer of Historical Landsat WBVT Data and Equipment

Based on preliminary agreements between the USGS, NOAA, and NASA, we have initiated action to secure space for equipment and data required to transfer the subject systems and data to the EROS Data Center.

We will not be able to sign the contract for space until we have a final commitment from NASA and NOAA that the data and equipment will be shipped.

After this commitment is received, an additional 60 days will be required to award the contract and prepare the facility for occupancy.

Please contact Gary Metz in my office (FTS 784-7125) if we can assist in seeking the necessary approvals.
