

July 27, 1970  
Harding Hall

Mr. William Fisher  
Research Coordinator  
EROS Program/USGS  
Rm 5226, GSA Bldg.  
Washington, D. C. 20242

Dear Bill:

I am enclosing two copies of a high altitude (60,000 ft) photo taken by the NASA RB-57 aircraft on May 26, 1970. The flight was made in support of the remote sensing hydrology studies we are conducting for USGS.

The area shown includes Sioux Falls and northeast and covers the three EROS sites still under consideration. They are outlined with red grease pencil. The scale of the photo is approximately 1/2 inch equals one mile. I should point out that the original transparency had poorer illumination distribution. We improved it with backlight dodging. Hope this will be of use to you.

Sincerely yours,

A handwritten signature in cursive script that reads "Vic Myers".

Victor I. Myers, Director  
Remote Sensing Institute
