

Lake Thompson, South Dakota, USA

Lake Thompson, South Dakota, USA 1984–2020

Above normal rainfall in the 1980s resulted in the dramatic filling of Lake Thompson, South Dakota, along with other nearby lakes and sloughs. Water levels continue to fluctuate depending on annual precipitation. Lake Thompson, a crucial habitat for migratory birds, is now South Dakota's largest natural lake.

Date	Satellite	Bands	Res	Path	Row
Aug. 29, 1984	Landsat 5 TM	7,5,3	30 m	29	29
Sept. 1, 2020	Landsat 8 OLI	7,6,4	30 m	29	29

Earthshots: Satellite Images of Environmental Change

The U.S. Geological Survey Earth Resources Observation and Science (EROS) Center archives data from the Landsat satellites (1972–present). Earthshots presents environmental changes using Landsat images.
