

Cheyenne Bottoms, Kansas, USA

Cheyenne Bottoms, Kansas, USA 2021–2022

Cheyenne Bottoms in central Kansas is the largest inland wetland in the United States. Two intermittent streams flow into the Bottoms from the northwest. Canals were built to divert water from the Arkansas River and Wet Walnut Creek to provide a source of supplemental water to the wetland. However, a drought in 2022 left the Bottoms dry.

Date	Satellite	Bands	Res	Path	Row
Oct. 22, 2021	Landsat 8 OLI	7,5,4	30 m	29	33
Oct. 25, 2022	Landsat 8 OLI	7,5,4	30 m	29	33

Earthshots: Satellite Images of Environmental Change

The U.S. Geological Survey Earth Resources Observation and Science (EROS) Center archives data from the Landsat satellites (1972–present). Earthshots presents environmental changes using Landsat images.
